

# Unleash the Power of Remote Operations to Revolutionize Frac Efficiency

Unify fracturing and remote operations with our integrated solution combining Corva's digital twin technology and Downing's Freedom Series Completion System. Integrating real-time insights and on-pad situational awareness, our automated solution empowers remote operations to utilize real-time data, to optimize safety and efficiency. This integrated solution enables remote operations to understand current on-pad situations enabling timely decision making through real-time insights.

Experience  
the Future of  
Completions

## Unleash the Power of Remote Operations Through:

**Seamless Integration with Downing's Freedom Series:** Corva's digital twin and Cold Bore's operational data stream are integrated with Downing's Freedom Series.

**Real-Time Pad-Level Insights:** Gain immediate access to real-time insights at the pad level, and drive operations with Corva's premier digital twin platform.

**Optimized Frac Operations:** Streamline operations by reducing pad personnel, bolstering safety, and lowering operational expenses through our automated solution.

**Confident Remote Operations:** Empower your remote operations with an added layer of confidence with Downing's comprehensive system-level control, Cold Bore's precise operational data stream, and Corva's advanced digital twin technology for a seamless and efficient operation.
